

Join us for a 1-day workshop focused on **Flying WILD** and **Project FeederWatch**. Flying WILD includes 43 activities focused on learning about birds, bird migration, and bird habitat through quizzes, contests, and hands-on projects. Project FeederWatch is a project of Cornell Lab of Ornithology and Bird Studies Canada that allows people of all skill levels and backgrounds to engage in Citizen Science by participating in bird counts in their backyards, schools, county Extension offices, etc. Six hours of education is required to use this curriculum. Most of the session will be indoors but a portion may be outdoors so dress appropriately for the weather and walking on a trail. Registration fee: \$30 (includes a Flying WILD Educator's Guide and bird feeder). Participants are asked to bring their own brown bag lunch and beverage. To register contact Ashley Osborne at ashley.osborne@uky.edu. UK/KSU Extension personnel may register on KERS.

Dates and Locations:

October 24

McConnell Springs Park

Lexington, KY
